

Google Dorking Complete Guide

This guide explains Google Dorking (Google Hacking) in a structured way for ethical hacking, exams, and practical OSINT usage.

What is Google Dorking?

Google Dorking is the use of advanced search operators to find hidden or sensitive information on the internet. It is mainly used in passive reconnaissance.

Basic Operators

site: restricts search to a domain (example: site:edu.pk) filetype: finds specific file types (example: filetype:pdf) intitle: finds keywords in title inurl: finds keywords in URL intext: finds keywords in page content

Important Dorks

Find login pages: inurl:login Open directories: intitle:'index of' Sensitive files: filetype:env DB_PASSWORD Emails: '@gmail.com' site:example.com

Combining Dorks

Example: site:edu.pk filetype:pdf cybersecurity This narrows results to Pakistani universities with cybersecurity PDFs.

Best Practices

Use only for ethical purposes Do not access unauthorized systems Use incognito mode Verify data before use

Pakistan-Based Examples

site:gov.pk filetype:pdf report site:edu.pk lecture notes site:com.pk inurl:login
